

# PRODUCT DATA SHEET POLYPROPYLENE HG385MO POLYPROPYLENE HOMOPOLYMER FOR INJECTION MOULDING

# DESCRIPTION

**HG385MO** is a polypropylene homopolymer intended for injection moulding. This product combines unique Borstar reactor design with Borstar Nucleation Technology (BNT) to produce highly crystalline polypropylene. This product is characterized by excellent flow properties combined with a narrow molecular weight distribution, well suited for low warpage products.

This product contains anti-static and slip additives, which result in short cycle time, easy demoulding and low dust attraction.

Products moulded from this grade exhibit excellent dimension consistency combined with high stiffness and gloss.

# **APPLICATIONS**

Caps and closures Appliances with great heat resistance Household articles

## **SPECIAL FEATURES**

High stiffness Heat resistance Shows excellent antistatic performance

HG385MO is easy to process with standard injection moulding machines.

Following parameters should be used as guidelines:Melt temperature:220 - 260°CHolding pressure:200 - 500barMould temperature:10 - 30°CInjection speed:As high as possibleShrinkage 1 - 2%, depending on wall thickness and moulding parameters

## STORAGE

**HG385MO** should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product. More information on storage can be found in Safety Information Sheet (SIS) for this product

#### SAFETY

The product is not classified as a hazardous preparation. Please see our Safety Information Sheet (SIS) for details on various aspects of safety, recovery and disposal of the product, for more information contact your Borouge representative.

## RECYCLING

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
